

BRAIN INJURY TRAINING

**Wednesday,
November 20,
9 a.m. to Noon**

- Overview of types, causes and mechanisms of brain injury
- Brain injury prevalence and incidence
- Brain injury prevention
- Levels of severity of brain injury and functional outcomes
- Concussion: An often overlooked brain injury
- Common effects of brain injury
- Impact of brain injury on life roles
- Strategies for dealing with the effects of brain injury
- Screening for undiagnosed brain injuries
- Resources for individuals with brain injuries and their families

The Brain Injury of Association of Pennsylvania, under contract from the Pennsylvania Department of Health, has developed a statewide Education and Training Program aimed at increasing participants' knowledge and understanding of brain injury. Trainings are designed for professionals in various fields who may come into contact with people who have sustained a brain injury in the course of their practice.

Trainings are designed to provide practical information to help professionals screen, refer, and provide meaningful interventions for their clients

Certificate of attendance
provided with the CEU
hours on it
